

**PUAF 300: Introduction to Sustainability**

**PUAF 650: Moral Dimensions of Public Policy**

**PUAF 699D: Disease, Disaster, and Development**

**PUAF 745: Human Health and Environmental Policy**

R. H. Sprinkle, M.D., Ph.D.

School of Public Policy

University of Maryland

I had long since introduced sustainability topics into three courses and was in the process of creating a fourth course about sustainability exclusively. Here's a course-by-course citation of sustainability content in current courses. I list the courses numerically.

**PUAF 300: Introduction to Sustainability**

This course, which "anchors" a new minor, will be taught for the first time FALL 2012. Pre-enrollment is 140 undergraduates. All content addresses sustainability.

**PUAF 650: Moral Dimensions of Public Policy**

Sustainability is addressed explicitly during three weeks:

WEEK 8: Abandoned peoples in irrelevant economies and dying environments;

WEEK 9: Stewardship; and

WEEK 15: Activism.

**PUAF 699D: Disease, Disaster, and Development**

Sustainability is addressed explicitly during three weeks:

WEEK 5: Demographic and health-systems transitions;

WEEK 8: Famine;

WEEK 11: Environmental degradation;

WEEK 12: Geophysical and meteorological instability; and

WEEK 13: Response assessed.

**PUAF 745: Human Health and Environmental Policy**

Sustainability is addressed implicitly throughout and explicitly during seven weeks:

WEEK 1: Linear regulatory policy meets non-linear unregulated nature;

WEEK 5: Animals hunted, herded, husbanded, encountered, and suppressed;

WEEK 6: Woods and fields;

WEEK 7: Wastes and waters;

WEEK 10: Rocks, minerals, and metals;

WEEK 14: Combustion and its alternatives; and

WEEK 15: Organismal implications of global incremental heat retention.
